Meeting Minutes

- Not much progress since the last meeting
- Britania created the Heroku account so that our web application can be hosted
- Britania created the git repository that team members could clone and attached it to the Heroku account to automatically deploy
- Jason created the foundation for the web application
- All have been running through tutorials on react and web development
- Ryan is going through tutorials to learn more about git through the command line
- Discussed what tasks are assigned to who by evenly splitting them up based on time and skill
